

LUCAS VIEIRA SOUZA

Full Stack Developer

I'm Lucas Souza, a Web Developer with skills in Angular, .NET(C#), and SQL like languages.

I'm able to build useful front-end interfaces and create back-end APIs, in a way that is able to improve productivity and write long-lasting clean code. I have experience on constant maintenance and bug fixing in projects.

I stay updated on new innovations, API's and new dev tools to bring more value to my projects.

My main goal is to deliver, efficient solutions.

Experience

● Endoscopy Institute Marcos Clarêncio

Freelancer

June 2024 - August 2024

As a freelancer, I was responsible for developing a website focused on courses in the area of medical endoscopy and nursing for 1000 users. The objective of the system is to promote in-person endoscopy courses and facilitate payment via PagSeguro. In the project, front-end, back-end and MongoDB were used.

● APTA Systems

Full-Stack Developer

April 2024 - Present

I worked in Full-stack development, handling Angular,.NET along with SQL Server management.

- In the development of Slock 2.0, I was responsible for improving of the visual aspects and create new functionalities, such as , creation of a dynamic screen to check the OPC-UA connection of a data source via UA EXPERT, conversion of spreadsheet data (Excel) into system data, login via RFID with the employee's badge, at this project we were able to protected more than 500 lives.

● CNA

Freelancer

Jan 2022 - Feb 2023

I served as a technician specializing in computer maintenance, troubleshooting hardware issues, formatting, and installations. My role involved providing comprehensive support for computer systems, ensuring optimal performance and resolving technical challenges efficiently.
