LUCAS VIEIRA SOUZA
Full Stack Developer

I'm Lucas Souza, a Web Developer with skills in Angular, .NET(C#), and SQL like languages.
I'm able to build useful front-end interfaces and create back-end APIs , in a way that is able the improve productivity and write long-lasting clean code , I have experience on constant maintenance and bug fixing in projects.
I stay updated on new innovations, API's and new dev tools to bring more value to my projects.
My main goal is to deliver, efficient solutions.

Experience

● CNA Idiomas
Freelancer   Jan 2022 - Feb 2023

I served as a technician specializing in computer maintenance, troubleshooting hardware issues, formatting, and installations. My role involved providing comprehensive support for computer systems, ensuring optimal performance and resolving technical challenges efficiently.

● Apta Sistemas
Full-Stack Developer   April 2024 - Present

I worked in Full-stack development, handling Angular,.NET(C#) along with SQL Server management.
- In the development of Slock 2.0, I was responsible for improving of the visual aspects and create new fuctionalities, such as , creation of a dynamic screen to check the OPC-UA connection of a data source via UA EXPERT, convertion of spreadsheet data (Excel) into system data, login via RFID with the employee's badge, at this project we were able to protected more than 500 lives.

● Endoscopy Institute Marcos Clarêncio
Freelancer   June 2024 - August 2024

As a freelancer, I was responsible for developing a website focused on courses in the area of medical endoscopy and nursing for 1000 users. The objective of the system is to promote in-person endoscopy courses and facilitate payment via PagSeguro. In the project, front-end, back-end and MongoDB were used.
