LUCAS VIEIRA SOUZA
FullStack Developer

Hi! I'm Lucas Souza, a Full-Stack Developer with skills in Angular, C#, and SQL. I'm fluent in English, with some Spanish and basic French from my time in Vancouver.
I'm able to build dynamic front-end interfaces and create back-end APIs with Swagger. I stay updated on new tech to bring innovation to my projects.
My main goal is to deliver smart, efficient solutions.

Education

● System of Information
PUC MG
2023-2026

● Project Management Foundations Google

● SSLC Speaking and Modern MediA(CAN-Vancouver)

● Red Hat System Administration

● ITA Agile Software Methodologies

Experience

● **CNA Idiomas**
Freelancer   Jan 2022 - Feb 2023

I served as a technician specializing in computer maintenance, troubleshooting hardware issues, formatting, and installations. My role involved providing comprehensive support for computer systems, ensuring optimal performance and resolving technical challenges efficiently.

● **Apta Sistemas**
Full-cycle Intern   April 2024 - Present

I worked in Full-stack development, handling Angular and C#, along with infrastructure and SQL Server management. Key contributions:
- Developing Apta Dashboards for complex statistics.
- Leading the development of Slock 2.0, an energy blocking system.
- Building features for Aerocina, like animal tagging and data visualization.

● **Endoscopy Institute Marcos Clarêncio**
Freelancer   June 2024 - August 2024

As a freelancer, I was responsible for developing a website focused on courses in the area of medical endoscopy and nursing. The objective of the system is to promote in-person endoscopy courses and facilitate payment via PagSeguro. In the project, front-end, back-end and MongoDB were used.
